

Production Access Questionnaire

Testers Community

The objective of this report is to provide comprehensive answers that our clients can use to fill the production access form. You can use the answers directly or can make changes based on how you improved the app. After 14 days of testing, users will be prompted to fill a form on closed testing to get access to production. This document can be helpful in answering those questions.

App Name: Metal Forge

App URL:

<https://play.google.com/store/apps/details?id=com.syntheticfaction.metalforge>

Production Access Questionnaire

1) How did you recruit users for your closed test? For example, did you ask friends and family, or use a paid testing provider?

We used a paid testing provider to obtain comprehensive and detailed feedback on the app. Additionally, we reached out to independent creators and heavy metal fans to gather real-world insights from our target audience, ensuring relevant user perspectives.

2) How easy was it to recruit testers for your app?

Answer: Easy

(You can select your own answer).

3) Describe the engagement you received from testers during your closed test

Testers actively engaged with the app, providing valuable insights on UI/UX improvements, keyword optimization, and feature representation. Their

feedback led to actionable changes, enhancing the overall user experience and aligning the app more closely with user expectations.

4) Provide a summary of the feedback that you received from testers. Include how you collected the feedback.

Testers highlighted the need for ASO optimization, improved screenshots showcasing features, a dynamic walkthrough for new users, and enhancements in UI/UX elements. Feedback was collected through surveys and direct communication channels, ensuring comprehensive insights.

5) Who is the intended audience for your app?

Metal Forge is designed for independent creators and heavy metal fans who seek to streamline their AI music production process. It serves musicians, producers, and enthusiasts looking for an effective tool to generate and manage AI-driven music projects.

6) Describe how your app provides value to the users.

Metal Forge enhances the music creation process by offering optimized prompt generation, a centralized workflow for managing AI assets, and an

immersive gothic-industrial design. This combination empowers users to produce high-quality music efficiently and creatively.

7) How many installs do you expect your app to have in your first year?

Answer: 10k - 100k

(You can select your own answer).

8) What changes did you make to your app based on what you learned during your closed test?

We focused on optimizing the app description for ASO, enhancing screenshots to better reflect features, implementing a dynamic user walkthrough, and improving UI/UX elements such as layout, spacing, and color contrast, resulting in a more user-friendly experience.

9) How did you decide that your app is ready for production?

After thorough testing phases, we incorporated feedback from diverse testers, addressed critical UI issues, and optimized key features. This process ensured the app is stable, user-friendly, and fully aligned with user needs, making it ready for successful deployment.

10) What did you do differently this time?

This time, we prioritized user feedback on ASO and feature representation, engaged a targeted group of testers for focused insights, and made iterative improvements based on structured feedback sessions. These strategies resulted in a more polished and user-centric app experience.

You can use the above answers or add your personal touch to those answers to make them more natural and meaningful. Don't forget that this form plays the most important role in the entire process of getting production access. If you have any more questions, please feel free to contact us.

**Best regards,
Testers Community Team**
